Professional Summary

Full Stack Developer with 3+ YOE building web and mobile products with **React, Next.js, React Native, TypeScript, and Node.js**. Delivers **booking, payment, and service workflow features** across journeys, **orchestration engines, real-time Socket.IO updates**, and cloud integrations with **Azure and AWS services**. Ships **end-to-end functionality** from frontend interfaces through **backend APIs, webhooks, notifications, and mobile app releases**.

Skills

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript, Redux Toolkit, TanStack Query

Backend & Data: Node.js, Express.js, Nest.js, REST APIs, PostgreSQL, Prisma, Redis, MongoDB, GraphQL

Cloud & Distributed Systems: Azure Functions, Azure Service Bus, AWS S3, Kafka, RabbitMQ, Temporal, Socket.IO

DevOps & Testing: Docker, Kubernetes, CI/CD, Git, Jest, Unit Testing, Test-Driven Development

Product Delivery: Agile, Scrum, Requirements Gathering, Feature Scoping, Cross-functional Collaboration

Experience

Antino Labs

Full Stack Developer

Bangalore, India

Oct 2025 – Present

- **Eats Assist – Airport & Travel Services Platform** 🔄: Built end-to-end customer journeys for booking **airport and travel services** including lounges, porters, meet & greet, baby prams, flowers, food, and other on-demand services.
- Developed core **booking, payment, catalogue, and service workflows**, including payment integration, **Azure Functions, Azure Service Bus**, webhooks, service/package/voucher management, and REST API integrations across frontend and backend.
- Built and integrated an **orchestration engine** to coordinate booking, service assignment, delivery, and operational workflows, along with **real-time Socket.IO communication** for live booking and service updates.
- Developed **notifications and user journey flows** across the platform and built mobile applications using **Capacitor**, including Firebase push notifications and production setup for both **Google Play Store and Apple App Store**.
- **Tripare AI** 🔄: Developed core features for a **business travel platform**, including **flight and hotel search, booking workflows, role-based access, Temporal workflows, Redis optimization, AWS integrations, and Zoho Invoice** for automated billing.

Silversky Technology

React Native Developer

Ahmedabad, India

Oct 2024 – Aug 2025

- **BetterMint Health** 🔄: Built the mobile application end-to-end with **React Native**, implementing personalized workout journeys based on user fitness goals and health profiles.
- Integrated **Google Fit, Apple HealthKit, and RevenueCat** for health and workout tracking and a **\$17/month subscription**, along with habit tracking, rewards, and guided tours.
- **EaziQuote** 🔄: Built the complete **billing flow** with API integrations, dynamic item-based **pricing and GST calculations**, and multi-tab state management for quote and invoice items.
- **Daily Shepherd** 🔄: Built core engagement features including **likes, comments, podcasts, favorites, content interactions, dynamic font scaling, themes, and text-to-speech**.

Six Sigma Solutions

Full Stack Developer

Ahmedabad, India

Feb 2024 – Aug 2024

- Built a scalable **CRM platform using React, Node.js, and Express**, improving data management efficiency by approximately **30%**.
- Developed **lead-to-client workflows, automated reminders, centralized customer data, and real-time notifications** to streamline sales operations.
- Developed **HRMS and Admin Analytics modules** with dashboards, employee management workflows, reporting, and data-driven insights to support internal operations and business decision-making.

Education

B.E. Information Technology, Sal College of Engineering

CGPA: 7.2/10 (2023)
