Professional Summary

Full Stack Engineer with 3+ years of experience building scalable SaaS and enterprise applications. Expert in **Node.js**, **Express.js**, **Nest.js**, **React.js**, **Next.js**, **TypeScript**, and **React Native** with strong focus on **backend architecture**, **API development**, **performance optimization**, and **scalable systems**. Skilled in **microservices**, **database design**, **caching**, **authentication**, and **cloud-based deployments**.

Core Competencies

- **Frontend Development:** React.js, Next.js, React Native, CSS3, JavaScript (ES6+), Tailwind, MUI, SCSS, Flexbox
- **Backend Development:** Node.js, Nest.js, Express.js, REST/GraphQL APIs, PostgreSQL, Prisma, Kafka, RabbitMQ
- **Cloud & DevOps:** AWS EC2, AWS Lambda, AWS S3, Azure Functions, Azure Service Bus, Firebase, Docker, CI/CD
- **State Management & Data:** Redux, Context API, TanStack Query, Zustand, Axios

Professional Experience

Oct 2025 – Present **Full Stack Developer**, Antino Labs

- Engineered **Kafka-based event-driven microservices** for a vehicle rental platform, enabling scalable and fault-tolerant workflows
- Processed **100K+ bookings/month** and handled **high-throughput real-time events** using **Kafka** and **RabbitMQ**
- Built **multi-tenant RBAC** with **invite onboarding** and secure **data isolation**
- Integrated **Zoho Invoice**, **AWS S3**, and **Firebase** for automated billing, scalable storage, and real-time notifications
- Optimized frontend performance and improved UI responsiveness for data-heavy dashboards

Oct 2024 – Aug 2025 **Full Stack Developer**, Silversky Technology

- Delivered **10+ scalable web and mobile applications** with robust **API integrations**, real-time **data synchronization**, and secure **payment gateway implementations**.
- Improved **payment reliability** in **5 Keys Communication** 🔗, reducing crashes by **40%**

Feb 2024 – Aug 2024 **Full Stack Developer**, Six Sigma Solutions

- Built a scalable **CRM system (React + Node/Express)** improving data management efficiency by **30%**.
- Optimized **healthcare platforms**, reducing patient processing time by **25%** and enhancing reporting performance.

Key Projects

- **Rental Platform (Node, React, Kafka, RabbitMQ, Socket.IO, Temporal)**
 - Built **real-time vehicle tracking and booking workflows** using **Socket.IO**, improving user visibility and interaction
 - Implemented a **fault-tolerant payment system** with **webhooks**, **idempotency**, and **transactional outbox** to ensure reliable transactions
 - Designed a **dynamic pricing engine** with rule-based logic and optimized performance using **Redis caching**, reducing response time by **30–40%**
- **Tripare AI (Node, React, Redis, AWS, Temporal)**
 - Developed **high-performance flight/hotel search** using **Redis indexing**, reducing query latency by **35%**
 - Built **role-based user management** with invite flow and integrated **Zoho Invoice** for automated billing and refunds
- **CRM System (Next.js, Node.js, Zustand, Nest.js, prisma)**
 - Built a **lead-to-client pipeline** with automated reminders and **Google Meet integration**
 - Improved **sales efficiency** with real-time notifications and centralized customer data

Education

B.E. Information Technology, Sal College of Engineering — CGPA: 7.2/10 (2023)

Achievements

- Improved **booking efficiency and cost savings** by implementing a **smart fare comparison module** in Tripare
- Reduced **system failures in payment workflows** by implementing **idempotent and fault-tolerant processing**
